INTRODUCTION

Anita Rosenbrock-Welter | Managing Director

WEAR PROTECTION FOR ALL APPLICATIONS!

Combating wear

Our company has decades of experience in the construction industry and is a reliable and strong partner for wear parts and wear protection. We manufacture and distribute products for earthmoving, demolition, recycling, and gravel extraction. Over the years, we have continuously refined our portfolio and added customized solutions for processing highly wear-resistant steel. From series and customized production to demanding repairs of all kind of attachments, you will find comprehensive services with us. With passion and

commitment, we work to find the best solution for our customers. VR is a trademark and guarantees delivery reliability, top quality, and market-driven prices.

Since 1980

Your reliable partner
in wear protection

PRODUCTION

Top-quality products from our production

- Cutting edges for loaders and excavators
- Delta (spade) edges
- Bolt-on edges
- Dozer cutting edges
- Base edge segments
- Bolt-on half arrow sections
- Square edge bars and rear wear plates
- Bolt-on wear plates
- Buffle plates
- Linings for gravel extraction plants
- Paddles and paddle holders for log washer
- Wear linings for recycling machines (such as impact mills, jaw crushers)
- Fabricated sladgehammers
- Screen plates
- Special products according to customer specifications

Strong parts made of highly wear-resistant steel

Whether series production or custom-made products: VeRotool offers tailored solutions for your individual requirements. We are a HARDOX® Wearparts partner, exclusively processing high-quality wear-resistant steel and manufacturing wear parts in outstanding quality exactly according to your specification. From bolt-on and weld-on cutting edges in standard or special sizes to flame-cut parts and sheet metal bending, as well as

12,000 sqm

Production and storage area

milling and special drilling – we implement everything precisely and ensure long product service lives at maximum hardness.

PRODUCT VARIETY

From our warehouse range

- Teeth & tooth systems for excavators and loaders (Bofors, CAT, ESCO®, C-Parts, Super V, Lehnhoff, UNI-Z, UNIZET-2000, bolt-on teeth and more as original and/or aftermarket parts)
- Weld-on and weld-in adapters, all kind of hardware, bolts & nuts
- Cutting edge profiles, wear strips, special profiles & grouser bars
- Bolt-on edges and segments (Standard, Caterpillar, Komatsu, Liebherr, Volvo)
- Cutting edges for bulldozer,
- Grader blades for motor grader
- Heel shrouds, lip shrouds, chocky bars
- Connector plates for quick coupler
- Safety hooks, side cutters
- Wear parts for demolition tools (teeth and blades for concrete crusher and scrap metal shears, different tools for demolition hammers)
- Wear parts for stone crushers
- Wear parts for gravel washing plants made of Ni-Hard-cast-material or highly wear-resistant steel (clay coarse grinder, paddles, paddle holders etc.)
- Screen plates and a lot more for the recycling industry

Powerful parts for tough needs

At VeRotool, you will find an enormously large selection of wear parts for excavators, loaders, and many other machines – directly from stock.

With over 100,000 teeth and accessories for all common tooth systems, 800 tons of cutting edge profiles, and versatile products for demolition tools, recycling machines, and gravel extraction, we offer our customers one of the best-stocked inventories in Germany. We not only supply many original equipment manufacturers or act as dealers for various original products. Our own replacement and aftermarket parts also impress with top,

1,000 tons
wear parts
always in stock

always consistent quality and attractive price advantages. Benefit from our extensive stock and our delivery capability!

Our workshop portfolio

- Repairing and modifications of excavator buckets, wheel loader shovels and other attachments for earth-moving machines (replacement of the base edge, weld-on of new adapters and renewal of different wear parts)
- Repairing and refitting of demolition tools (such as crushers, clam shells, scrap shears and hydraulic hammers)
- Repairing of booms, shafts etc.
- Modification of coupling systems to a quick coupling system (Oilquick, Lehnhoff, Verachtert, Wimmer, Liebherr)
- Refitting and modification of equipment for the recycling industry (Wear linings, baffle plates for impact mills, and rotor crushers & much more)
- Hardfacing for wear protection
- Unique modification work and customer solutions in accordance with customer needs
- General welding and cutting work

Turning old into new

Even the strongest and most resistant materials will eventually wear out under the toughest applications and extreme loads. But with VeRotool, your attachments are in the best hands! Our highly skilled employees repair, regenerate, and optimize your equipment so that it can return to work more durable than ever before. Trust in our expertise and let us bring your attachments back to peak condition. We ensure maximum operational readiness and service-lifetime.

Around 400
attachments
renewed per year

ALL-ROUND SUPPLY

With VeRotool, everything runs smoothly

Wear and tear in the construction, demolition, and recycling industry is unavoidable over time. The durability of machines and attachments depends to a large extent on the wear parts installed.

VeRotool supports you in all phases of your equipment's lifetime. You are guaranteed to find all suitable products for first equipment, including qualified advice, with us. No matter the type of machine, size, or application.

In case of wear, we provide replacements in the form of exchange parts in the usual quality – either as original or aftermarket products, according to your preference. With aftermarket parts, we offer you a more cost-effective but equally high-quality alternative.

If you need customized products or dimensions for your machines, we can realize them in our in-house production. We tailor even the most demanding customer requests and individual specifications.

Don't want to keep investing in new attachments? Then bring your worn-out equipment to us! We repair them and make them strong for the next use. There is almost nothing we can't regenerate or modify for you – always with sustainability in mind. You will hardly recognize your old iron.

From first equipment to general overhauls: VeRotool is your reliable partner!
